

RECORD

A Tool for recording derogation and revocation decisions in Grid Connection Codes

The [connection network codes](#) allow for derogations from the rules, in exceptional cases, for example, where compliance with those rules could jeopardise the stability of the local network or where the safe operation of a system user might require operating conditions that are not in line with the connection network codes.

Following the prescribed processes in the connection network codes, system users and system operators are allowed to request for derogations which are in turn assessed by the national regulatory authority (NRA), or other authority where applicable in a Member State.

Derogations may be granted, partially granted or refused, based on the Derogation criteria as specified by the NRA, or other authority where applicable in a Member State, in accordance with Article 61(1) of the [NC RfG](#), Article 51(1) of the [DCC](#) and Article 78(1) of the [NC HVDC](#).

This tool serves three distinct purposes, namely:

- Allows NRAs and other relevant authorities to maintain a register of all derogations they have granted or refused and to provide ACER with an updated and consolidated register at least once every six months, a copy of which shall be given to ENTSO for Electricity in accordance with Article 64 of the [NC RfG](#), Article 54 of the [DCC](#) and Article 82 of the [NC HVDC](#);
- Informs the Agency's implementation monitoring in accordance with Article 9 of the Regulation (EC) No 714/2009); and
- Enables the Agency to monitor the procedure of granting derogations with the cooperation of the NRAs or relevant authorities of the Member State in accordance with Article 65.1 of the NC RfG, Article 55(1) of the DCC and Article 83(1) of the NC HVDC.

You may access the Derogation criteria and Derogation decisions, as well as, and Revocation decisions by clicking corresponding buttons at the top of this page.

Contact and support

At any time while working with the RECORD application you may get support from the Agency staff. If you have any problems or questions related to the VALVE application, please contact support team at:
