### LNG price assessment data statistics\*

Number of transactions	7	Number of market participants	11
Traded volume in MWh	6,705,566	Number of LNG terminals	15

\* Only relevant DES SPOT LNG transactions considered for both zones

### COMMENT

For the 5-working day rolling window considered for the LNG price assessment, ACER collected:

Eligible for price assessment:

- 7 spot Deliver ex ship (DES) transactions for the relevant delivery period,
- 1 firm spot DES bid.

According to the Methodology [1], ACER was able to calculate the price for the NWE zone, but not for the SE zone. The SE price assessment reported above is thus the same as published on the 31/01/2023. ACER's LNG price assessment relies on the LNG market data reported – the facts on transactions, bids and offers. All IT systems are up and running. 74 LNG market participants are registered and can report. LNG market participants are reminded on their reporting obligation and encouraged to report their LNG market data via TERMINAL.
