LNG price assessment data statistics*

Number of transactions	4	Number of market participants	8
Traded volume in MWh	4,214,462	Number of LNG terminals	13

* Only relevant DES SPOT LNG transactions considered for both zones

COMMENT

For the 5-working day rolling window considered for the LNG price assessment, ACER collected:

Eligible for price assessment:

- 4 spot Deliver ex ship (DES) transactions for the relevant delivery period,
- 1 firm spot DES bid.

According to the Methodology [1], ACER was not able to calculate the price for the NWE and SE zones. The NWE price assessment reported above is the same as published on the 06/02/2023 and the SE price is the same as published on the 31/01/2023. ACER's LNG price assessment relies on the LNG market data reported – the facts on transactions, bids and offers. All IT systems are up and running. 74 LNG market participants are registered and can report. LNG market participants are reminded on their reporting obligation and encouraged to report their LNG market data via TERMINAL.

Please note that 8th of February 2023 is an ACER holiday and no assessment will be published.
